Lifecycle rule configuration

Lifecycle rule name
rule1lifecycle

Status
Enabled

Scope
Entire bucket

Prefix
-

Object tags
-

Minimum object size
-
When no minimum object size is specified, the minimum object size for transitions is determined by the lifecycle configuration. Learn more

Maximum object size
-

Review transition and expiration actions

Current version actions

Day 0
- Objects uploaded

↓

Day 60
- Objects move to Standard-IA

Noncurrent versions actions

Day 0
- Objects become noncurrent

↓

Day 30
- 1 newest noncurrent versions are retained
- All other noncurrent versions move to Standard-IA

Lifecycle rule details

You can configure Amazon S3 Lifecycle rules to store your objects cost-effectively throughout their lifetime. You can instruct Amazon S3 to transition objects to less-expensive storage classes or to archive or delete objects.

Use this page to see the scope of the selected S3 Lifecycle rule. You can also view transition and expiration actions for current and noncurrent object versions, based on your lifecycle rule.

For **Current version actions**, you can see the following information:

- Since object creation, *the number of days* after which a current version will be transitioned and *the storage class* to transition that version to.
- Since object creation, *the number of days* after which a current version will be expired.

For **Noncurrent versions actions**, you can see the following
